

**Notice of E-Filing System Problem/Error for Motion to Remand**

10/27/23

I attempted to file the motion to remand with attachments/exhibits tonight on 10/27/23 but there was a problem with the efilng system that prevented me from uploading the documents I wanted to upload. There was a file size problem or error. Because of the file size error, I was prevented from filing the motion to remand with attachments/exhibits. See screenshot below.

The screenshot shows a web browser window for the CM/ECF system at [ecf.nhd.uscourts.gov/cgi-bin/Dispatch.pl?132101226403965](http://ecf.nhd.uscourts.gov/cgi-bin/Dispatch.pl?132101226403965). The user is logged in under case 1:23-cv-00374-JL-TSM Bisasor v. Donais et al. A prominent error message states: "ERROR: A file could not be uploaded because it exceeds the allowed size limit (in megabytes). The size of the selected file is 37.98 MB". Below this, it specifies the error file as "C:\fakepath\REFILED MOTION TO REMAND-15-w-attached.pdf". A table titled "Submitted Entries" shows one entry: Main Document, C:\fakepath\REFILED MOTION TO REMAND-15-w-attached.pdf, Category -, Description -. At the bottom of the page is a standard Windows taskbar with various icons and the date/time 10/27/2023.

So I tried to separate the motion to remand from the attachments/exhibits. But when I separated them, the exhibits were still not allowed to be filed by the efilng system. See screenshot below.

This screenshot shows the same CM/ECF interface as the previous one, but with a different file path. The error message is identical: "ERROR: A file could not be uploaded because it exceeds the allowed size limit (in megabytes). The size of the selected file is 18.50 MB". The error file is now listed as "C:\fakepath\11712989252-remand.pdf". The "Submitted Entries" table again shows one entry: Main Document, C:\fakepath\11712989252-remand.pdf, Category -, Description -. The Windows taskbar at the bottom includes the date/time 10/27/2023.

I did not nor was aware that there was a file size problem with the e-filing system. For example, the same motion for remand that I previously filed in MA federal court with no error (with the same file size as before), now generated a filing error when filed in this court. See screenshot above.

Either way, because of the file size problem, I could not file the motion with the exhibits or the exhibits alone. See screenshot above. I am trying to separate the exhibits from the motion to remand and to rework the filing to exhibits including using compression (using certain software online) in order to be able to file the exhibits separately at some point.

Similarly, I am currently returning home from a family emergency which takes several days by car (of which I already have altered the court of). Consequently, I am in a different earlier time zone than NH. Because I am in a different earlier time zone (in traveling back to MA), my time is currently 11.23pm on 10/27/23. It is not clear whether the system will log my time or Eastern time. If it logs Eastern time then it may appear that this filing is done just after midnight, when from my end it is done before midnight of 10/27/23.

Either way, given the above efilng errors and problems<sup>1</sup>, and my expeditious resolving of this, I ask that the above is considered regarding this filing to extent it may be necessary.

Sincerely,  
Andre Bisasor

---

<sup>1</sup> NB: These obstacles also resulted in a minor delay in filing the other motions, i.e., specifically the motion to enter default against Russell Hilliard.
